BE SMART • BE SAFE • PROTECT OUR COMPUTERS!

10 GOLDEN RULES FOR A SAFE ICT LABORATORY

1. No food or drinks	Keep food and drinks away from computers to prevent spills and equipment damage.
2. Handle equipment gently	Do not hit, shake, pull or drop computers and accessories.
3. Keep the laboratory clean	Keep desks tidy and dispose of waste in the proper bins.
4. Keep away from exposed wires	Never touch damaged cables, sockets or electrical connections. Report them.
5. Follow instructions	Use equipment only after the teacher or laboratory technician gives permission.
6. No unauthorized software	Do not install, delete or change software and settings without permission.
7. Use the internet responsibly	Avoid harmful, offensive or unrelated websites and respect other users.
8. Sit properly and avoid overcrowding	Use a comfortable posture and keep walkways clear.
9. Shut down correctly	Save your work and use the operating system's shutdown procedure.
10. Report faults immediately	Tell the teacher or technician about damaged, hot, noisy or faulty equipment.

If you see a hazard or damaged equipment, stop using it and inform the teacher or laboratory technician immediately.
