O-Level Computer Studies Syllabus – Sample Guide

Illustrative topic guide, not an official national syllabus

Topics for study may include computer systems, hardware and software, input and output devices, data storage, operating systems, word processing, spreadsheets, presentations, networks, internet use and computer security.

Learning outcomes: Identify major computer components; explain how input, processing, output and storage work together; use common productivity applications; practise safe and responsible online behaviour.

Note: Teachers should compare this sample guide with the current syllabus issued by the relevant education authority.

Learning reminder: Use this sample handout alongside the teacher's instructions and the approved school curriculum.
