Senior Two Chemistry Revision Notes

Sample revision handout

1. Matter: Matter is anything that has mass and occupies space. The three common states are solid, liquid and gas.

2. Elements, compounds and mixtures: An element contains one type of atom. A compound contains elements chemically combined in fixed proportions. A mixture contains substances physically combined.

3. Separation: Filtration separates an insoluble solid from a liquid; evaporation can recover a dissolved solid; distillation separates liquids using differences in boiling points.

Revision questions: Define matter. Distinguish a compound from a mixture. State one use of filtration.

Learning reminder: Use this sample handout alongside the teacher's instructions and the approved school curriculum.
